

Lidea

N°1 NON-GMO SOYBEAN BREEDER IN EUROPE!

2025/2026

SOYBEAN

1ST SOYBEAN RESEARCH IN EUROPE

Since 1975, Lidea soybean research creates varieties with higher yields and protein content, perfectly adapted to each European climatic zone and to the different market segments (feed and food).

Lidea uses the very latest laboratory technologies (molecular marking, genomics, etc.), field selection and off-season seed production to accelerate the genetic progress of soybean.

Our many research stations and testing locations across Europe enable us to select the best varieties in terms of yield potential, protein content, lodging, disease and pod shattering tolerance, adapted to each climatic zone and market segment (feed, food, textured protein, etc...).

Patrice JEANSON
Soybean Research Manager

Roman FERRANT
Soybean Breeder

Soybean seed factory Soybean research center Soybean testing location

Lidea is also the N°1 Soybean seed producer in Europe with many soybean seed factories from West to East.

EARLY PORTFOLIO: FROM THE EARLIEST TO THE LATEST

MATURITY	NAME	HILUM COLOR	GROWTH TYPE	YIELD	PROTEIN	KERNEL SIZE	FOOD	DESCRIPTION
VERY EARLY (000)	NEW! **LID EXPLORATOR**			+++	+++	++		**The future new European leader at the beginning of group 000** (+6% yield and +1 point of protein compared to ES Comandor).
	ES COMANDOR			++	++	+++		**Our earliest variety and n°1 in Feed and Food in Northern Europe.** Do not treat with pendimethalin.
	NEW! **LID DIAMANTOR**			+++	+++	++		**The new very early yield and protein content leader with good lodging tolerance. Grey hilum. Registered in FR/PL/RO.** Do not treat with metribuzin.
	NEW! SUCCESSOR			+++		+++		A super yield leader registered in DE/SK/RO with triangular leaves. Good Food criteria (yellow hilum, large kernels) with lodging/diseases tolerances. Do not treat with metribuzin.
	ES COLLECTOR			+++	++	++		**Excellent yield results all over Europe !** Yellow hilum, large kernels, good lodging tolerance.
	ES CHANCELLOR			+++	++	++		Provides high yield security, early vigor, high lodging and pod shattering tolerance.
	NEW! LID MERCATOR			+++	+++	++		A new variety with excellent yield and Food criteria (yellow hilum, high protein content, large kernels). Good early vigour. Do not treat with metribuzin.
	ES SENATOR					++		Good yield stability and diseases tolerances. Large kernels and Yellow hilum. Do not treat with metribuzin.
	NEW! LID DETECTOR			+++	+++	+++		Very good yield and food criteria (high protein content, yellow hilum, large kernels). Short plant and good lodging tolerance. Do not treat with metribuzin.
	ES COMPOSITOR			+++		+++		**The n°1 in yield potential in the group 000 with yellow hilum and large kernels!** Do not treat with Metribuzin.
EARLY (00)	ES ALBATOR			++	++	++		Good yield potential, protein security, yellow hilum with ES MENTOR aspect. Do not treat with metribuzin.
	ES VISITOR			+++		++		A very early variety with excellent yield potential, very good vigor and high diseases tolerance.
	ES MENTOR			++	+++	+++		**The most famous variety in Europe ! Excellent combination between yield potential, food criteria and lodging tolerance.** Do not treat with metribuzin.
	SAILOR			+++		+++		A new yield leader with large kernels.
	ES PROFESSOR			++	++	+++		Good yield potential and protein content. Very large kernels and good lodging tolerance. Do not treat with metribuzin.
	NEW! **LID CONSTRUCTOR**			+++	++	++		**The new super yield leader at the end of group 00! Grey hilum.** Do not treat with metribuzin.
	NEW! **LID YENDOR**			+++		+++		**The best in yield and proteins ! A Hi-Pro leader with excellent yield potential and Food criteria (very high protein content, large kernels, grey hilum).**
	ES DIRECTOR			++				**Very good yield variety with yellow hilum and ES MENTOR aspect ! Good early vigor and lodging tolerance.**

VARIETY IN BOLD: *Sales leader* *Semi-determinate* *Indeterminate* ++ *High* +++ *Very High*

Proteins Master *varieties are the varieties with the **Hi**ghest **Pro**tein content for both the FOOD and FEED markets. Lidea is a Protein leader in Europe.*

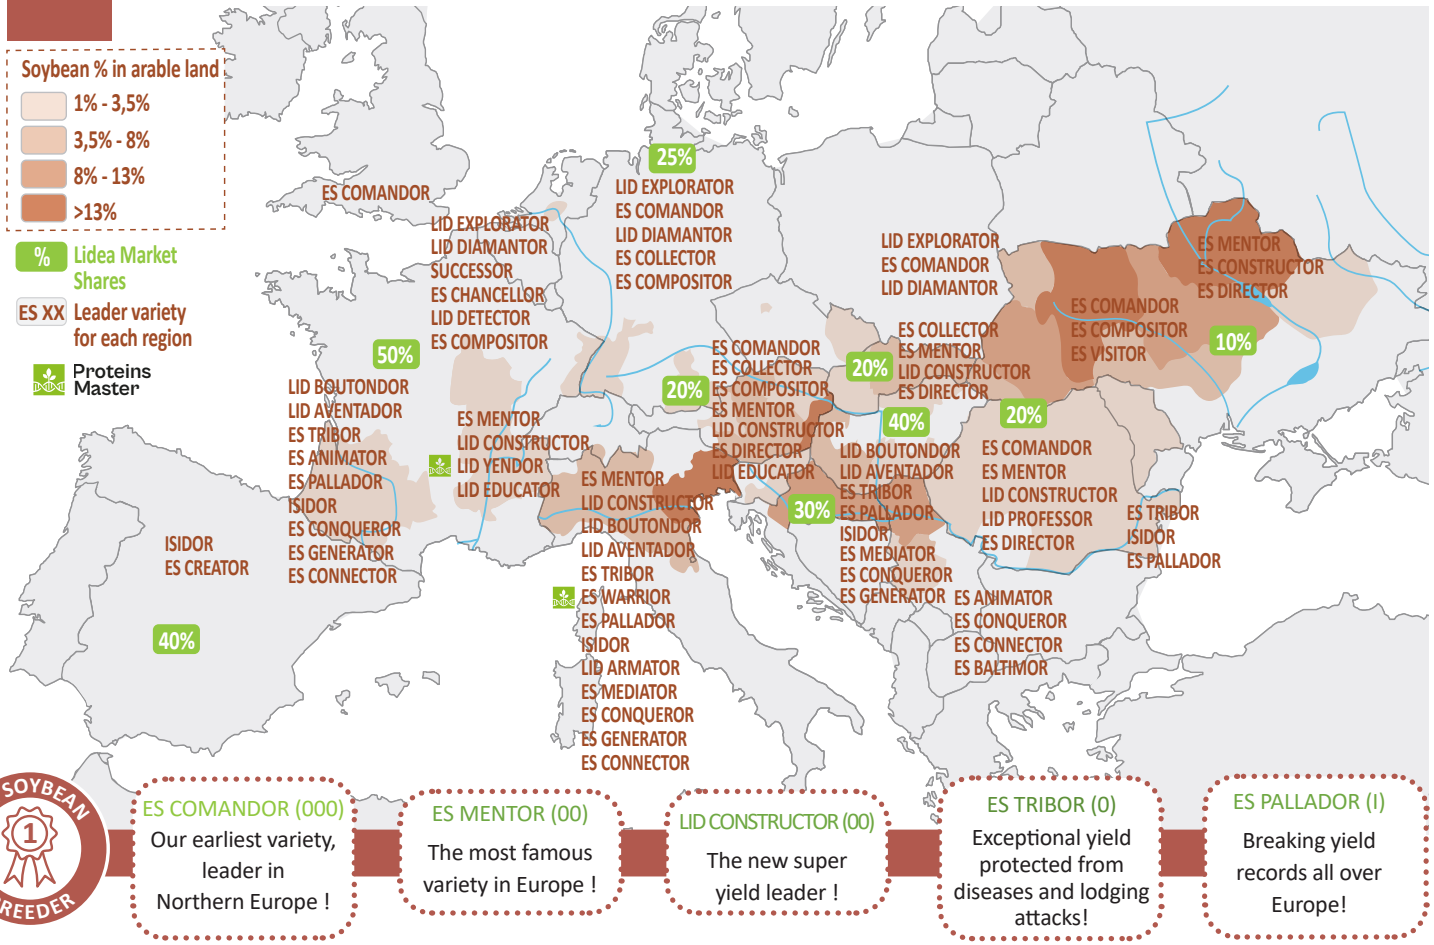

MATURITY	NAME	HILUM COLOR	GROWTH TYPE	YIELD	PROTEIN	KERNEL SIZE	FOOD	DESCRIPTION
MID-EARLY (0)	NEW LID EDUCATOR			++	+++	+++		A very early «Group 0» variety with very good yield and Food criteria (protein content, large kernels). Do not treat with metribuzin.
	NEW **LID BOUTONDOR**			+++	++			**An excellent compromise yield/maturity/proteins in the middle of Group 0.**
	NEW **LID AVENTADOR**			+++	++	++		**The first Lidea variety from the middle of Group 0 with a yellow hilum.** Excellent compromise yield/maturity/proteins.
	ES TRIBOR			+++		++		**The new yield leader in group 0 in Europe !** Excellent lodging, diseases tolerances and stability. Grey hair.
	ES ANIMATOR			++	+++	+++		Excellent protein yield and Food criteria (high protein content, large kernels)! Good early vigor and lodging tolerance.
	ES WARRIOR			++		++		The new group 0 leader in protein content (about 45%) for Food & Feed segments. New Food standard in official trials in Hungary.
MID-LATE (I)	**ES PALLADOR**			+++	++			**The n°1 variety for yield across Europe!** Excellent protein content. Ramifications, Indeterminated growth, lanceolates leaves and grey hair.
	ISIDOR			++	+++	+++		**The n°1 variety for human Food.** Excellent protein content, yield, sclerotinia and lodging tolerance.
	NEW LID ARMATOR			++	++	++		An early variety with excellent yield, lodging tolerance and good Food criteria (good protein content, large kernels).
	ES MEDIATOR			++	++	++		An improved version of ISIDOR with higher yield potential, excellent protein content and good lodging tolerance.
	ES CONQUEROR			++	+++	++		**An improved version of ISIDOR with higher yield potential and proteins.** Excellent lodging and sclerotinia tolerance.
	ES GENERATOR			+++	+++	+++		**Exceptionnal yield potential, good protein content and large kernels.** A future n°1 in yield and protein content in the middle of group I in Europe.
	WENDY			+++				A yield leader for Feed segment in all situations ! Grey hair. Can be sold only in France, Spain, Italy, Hungary, Romania & Bulgaria.
	ES CONNECTOR			+++	++	++		The new n°1 variety in yield potential at the end of group I in Europe.
	NEW LID GOLEADOR			++	++			Good yield and lodging tolerance (short plant) for this variety at the end of Group I. Triangular leaves & small kernels.
LATE (II)	ES CREATOR			++	+++	++		Our n°1 variety for Food in group II. Excellent yield potential and protein content.
	ES BALTIMOR			+++		++		The latest variety with the highest yield potential from our entire portfolio. Reserved for regions using groups II and III.

VARIETY IN BOLD: *Sales leader* *Semi-determinate* *Indeterminate* ++ *High* +++ *Very High*

Proteins Master *varieties are the varieties with the **Hi**ghest **Pro**tein content for both the FOOD and FEED markets. Lidea is a Protein leader in Europe.*

LIDEA MARKET SHARES AND PRODUCT LEADERS

N°1 SOYBEAN BREEDER

ES COMANDOR (000)
Our earliest variety, leader in Northern Europe !

ES MENTOR (00)
The most famous variety in Europe !

LID CONSTRUCTOR (00)
The new super yield leader !

ES TRIBOR (0)
Exceptional yield protected from diseases and lodging attacks!

ES PALLADOR (I)
Breaking yield records all over Europe!

N°1 Soybean portfolio & Seed Producer in Europe from VERY EARLY (000) to VERY LATE (II) for FOOD and FEED

In order to develop Soybean in Europe, Lidea is an active member of the following soybean associations:

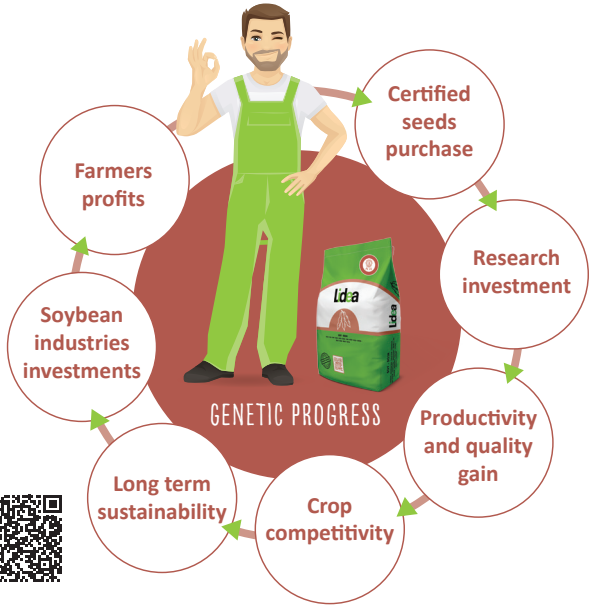

EUROPE SOYA · DONAU SOJA · MAGYAR SZÓJA

SOYBEAN CERTIFIED SEEDS

SEED CERTIFICATION STANDARDS

QUALITY CRITERIA	LEVEL
Germination	min 80%
Moisture	max 15%
Variety purity	min 99%
Specific purity	min 99%
Number of seeds other than soybean	max 5/kg
Number of sunflower seeds	max 2/kg
Number of invasive weed seeds	0
Inert materials other than broken kernels	max 0.3%
Seeds with presence of Diaporthe	max 15%

"For five years, the EURALIS cooperative has been developing a soybean supply chain for food. We supply French soyfood companies with soybeans that are 100% coming from certified seeds to ensure traceability, safety, and legality. Our soybean production area is in South-West of France, next to the Pyrenees and the Atlantic Ocean.

The warm but mild climate of this region is ideal for food soybean. We systematically irrigate all our fields to obtain optimal yield and quality (large kernels, high protein content, harvest of plants at the right maturity stage)."

Franck CAMET-LASSALLE
Supply Chain Manager, EURALIS Cereals

Discover SOJALIM

SOJALIM is an animal feed factory in South-West France owned by EURALIS Group (LIDEA Seeds) and SANDERS (AVRIL Group). Each year, 50,000 tons of non-GMO and local soybean (organic and non-organic) are mechanically triturated to provide soymeal for the high quality local certified meat markets.
All the grains crushed are coming from the harvest of certified seeds to guarantee quality, traceability and respect of intellectual property.

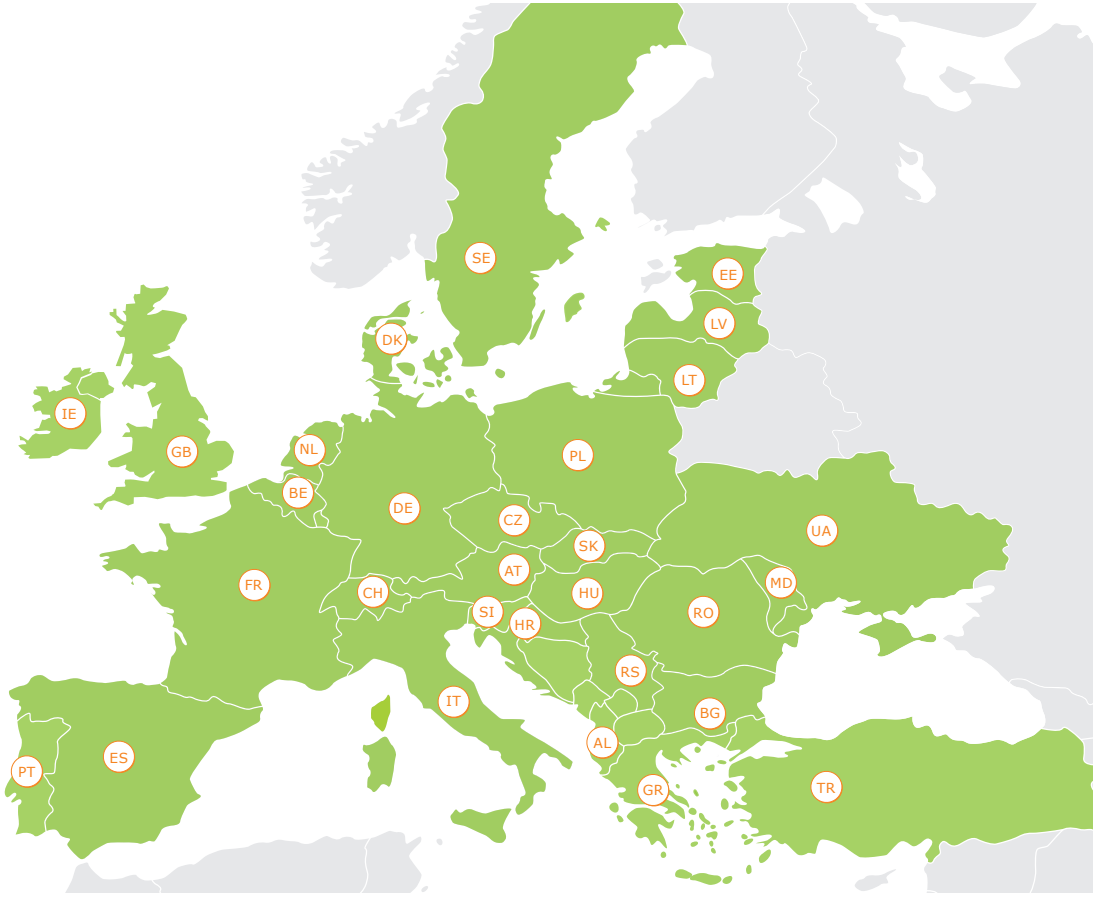

Arnaud CERVERA
General Manager, SOJALIM

"We are part of a high-quality meat supply chain in which consumers demand non-GMO, local and sustainable soymeal. Certified seeds are the perfect answer to ensure non-GMO traceability from the farm to the fork!

The protein content, yield and genetic progress generated by these certified seeds are excellent and ensure sustainable development of the soybean crop in our region."

Lidea is a key player in the seed sector, operating across the entire value chain: research, production and sales. Lidea is present worldwide, mainly in Europe, with a diversified portfolio of crops.
